

## *The digital enchantment*

*The marriage of History and the Digital:  
concert, image projection, live illumination  
for your company and in exclusivity!*

### *An exclusivity Château de Vixouze*

*Offer a personalized musical and visual experience.  
Magic: your evening in the colors of History.*

The Château de Vixouze and its Partner AGE7 combine piano, keyboards, guitars, vocals and samples (music samples) for an immersive live production and invites each of your guests to live the History of the Château de Vixouze from the dawn of time to ... today.

And "today" is the day of your event! Your company will enter into the History of this unique medieval place and will be integrated into the personalized fresco.

Through a maze of images and sounds, your guests will be invited to travel through "windows of time" allowing them to revisit the adventures that have marked this historic site that is the castle of Vixouze.

If the different eras evoked are characterized by their musical tonalities, they will be intimately linked to the contemporary side of technology.

Samples will be broadcast in real time and each guest will be immersed in video sets projected on the facade of the castle (or in the Pavillon au Roi in case of rain).
